Wordpress: caching activeren voor een snelle website

Volg onderstaande stappen om je Wordpress site tot 10x sneller te maken.

1. Ga naar Plugins, klik op Add New en zoek vervolgens naar 'wp super cache'. In onderstaand screenshot zijn deze acties rood omlijnd.

2. Zoek Wp Super Cache op in de zoekresultaten en klik op Install.

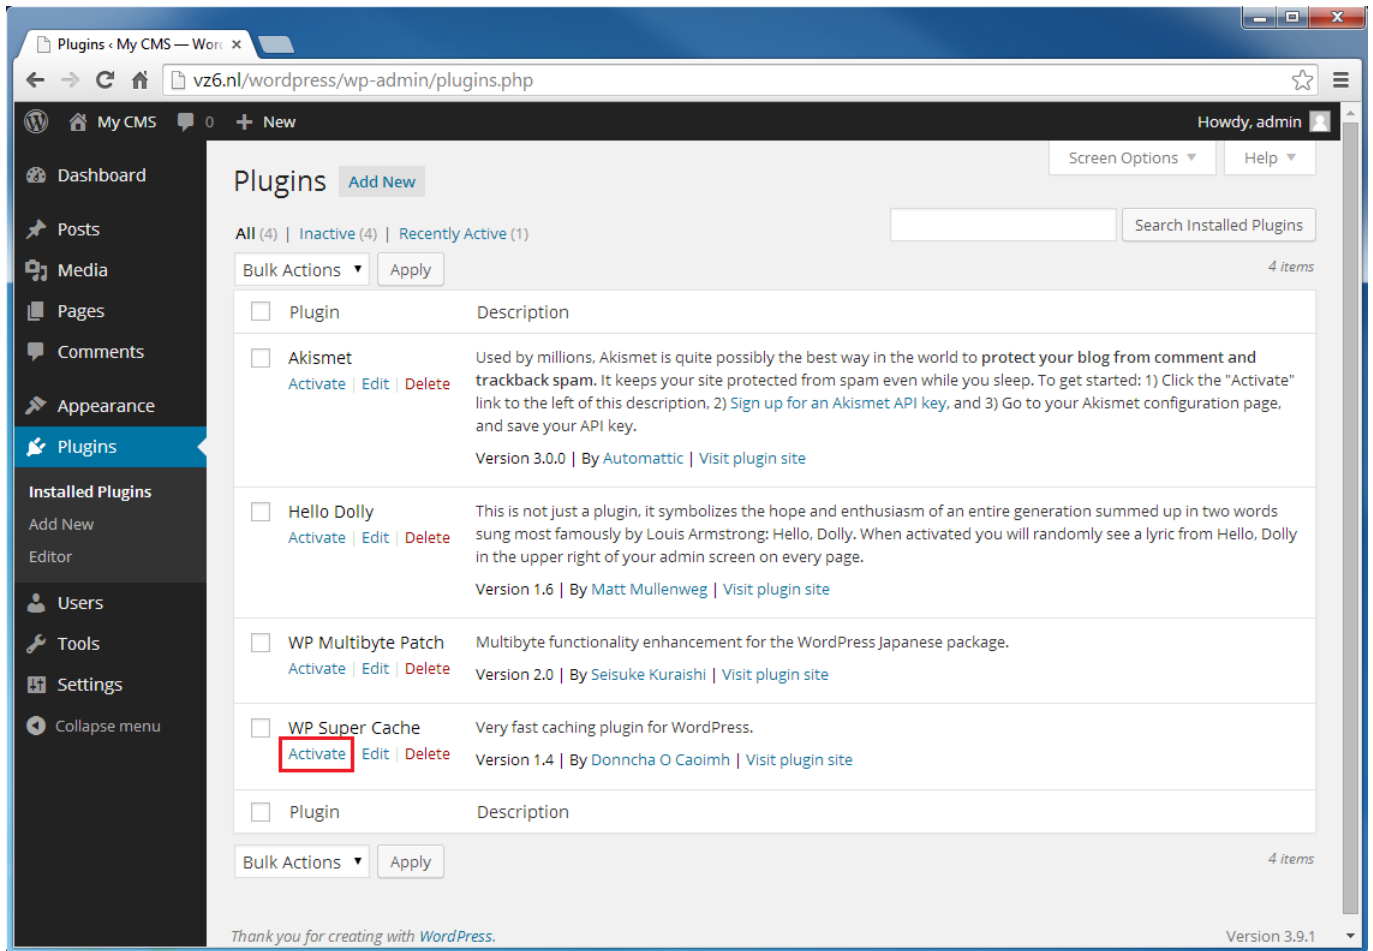

Scripts

The screenshot shows the WordPress 'Install Plugins' interface. The search bar contains 'wp super cache'. The results table is as follows:

Name	Version	Rating	Description
WP Super Cache Details Install Now	1.4	★★★★☆	This plugin generates static html files from your dynamic WordPress blog. After a html file is generated your webserver will serve that file instead of processing the comparatively heavier and more expensive WordPress PHP scripts. The static html files will be served to the vast majority of your users, but because a user's details are displayed in the comment form after they leave a comment thos... By Donncha O Caoimh.
WP Super Cache - Clear all cache Details Install Now	1.2	★★★★★	The plugin clears completely the cache from WP Super Cache, directly from the admin menu. We created this plugin, in order to be able to clear the cache completely from the admin menu and not having to navigate to CONTENTS tab in WP Super Cache Settings. In some configuration WP Super Cache shows a menu entry to empty the cache in the menu, but it only empties the cache from the current page. See... By Apasionados.es.
WP Widget Cache Details Install Now	0.26	★★★★☆	A high-performance caching plugin for WordPress, and a plus for WP-Cache or WP Super Cache! Why we need this WP Widget Cache? WP Widget Cache can cache the output of your blog widgets. Usually it will significantly reduce the SQL queries to your database and speed up your site. I think you've heard of WP-Cache or WP Super Cache, they are both top plugins for WordPress, which make your sit... By Andrew Zhang.
WP Fast Cache Details Install Now	1.4	★★★★☆	WP Fast Cache is built for pure website loading speed - You will not be able to find any cache that loads a webpage faster, simple as that. This caching system allows users to cache, pages, posts, categories and any other url on their website. This cache works by creating a static html file for every page cached and then serving that page up first, meaning for cache pages apache only has to serv... By Taylor

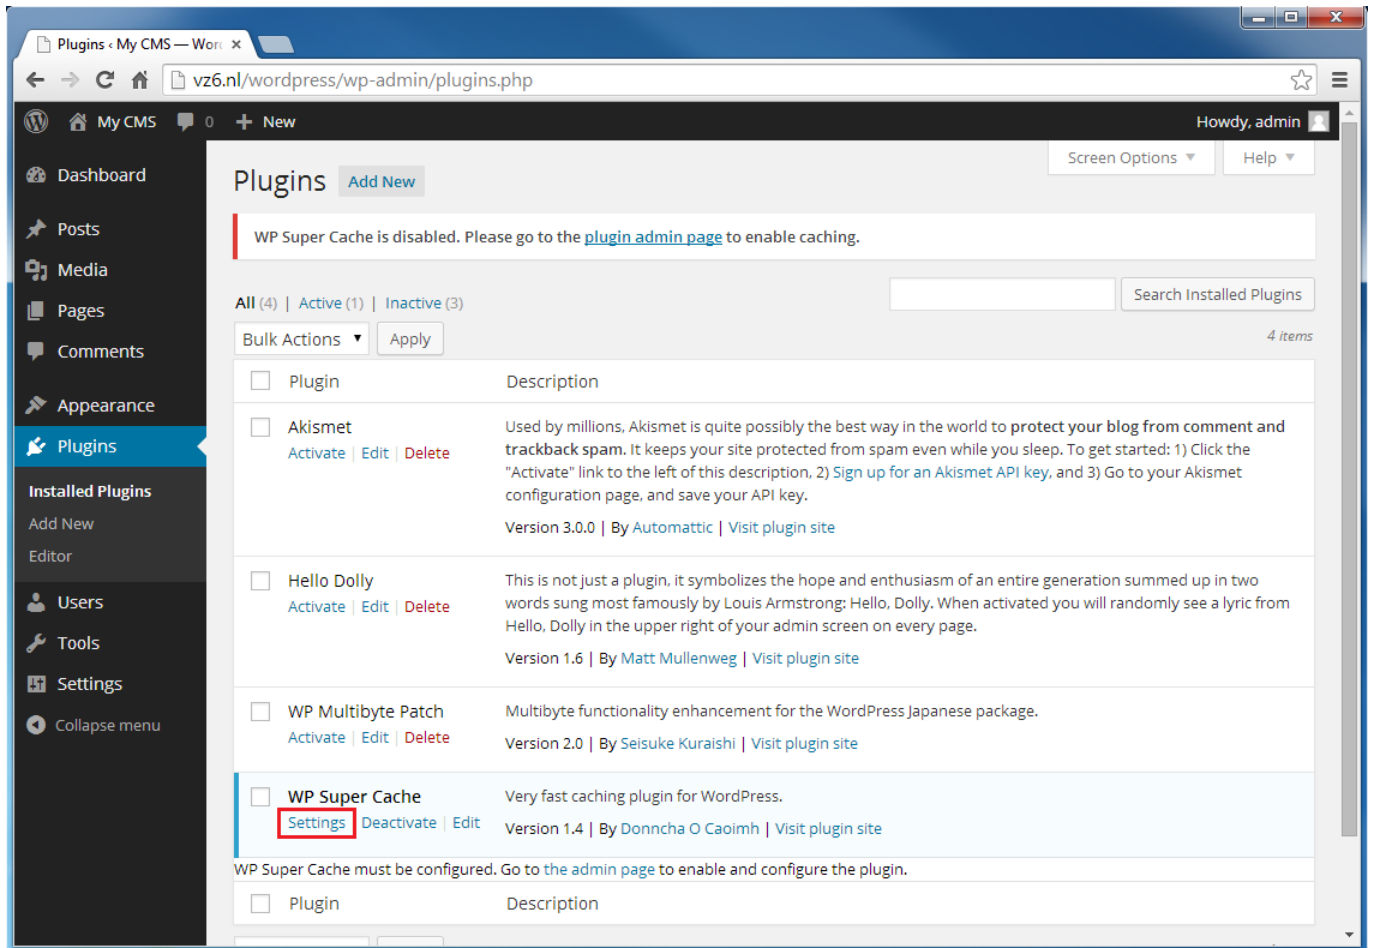

3. Ga na installatie van de plugin, terug naar het overzicht van geïnstalleerd plugins "Installed Plugins" en klik op Activate.

Scripts

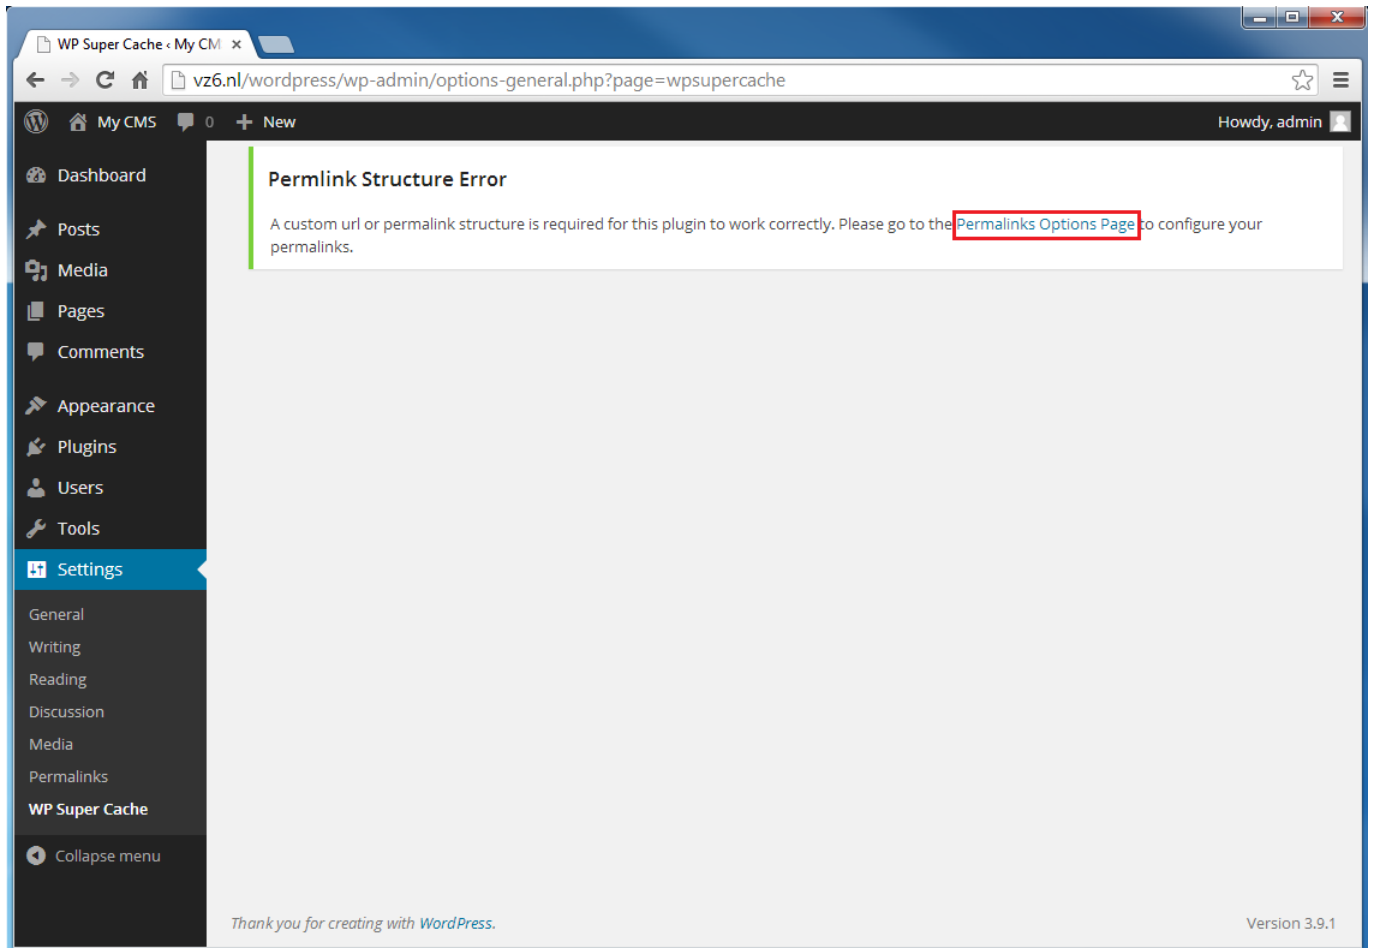

4. Je hebt de plugin nu geactiveerd. Klik nu op Settings om de plugin te configureren. Caching is nu namelijk nog niet actief.

Scripts

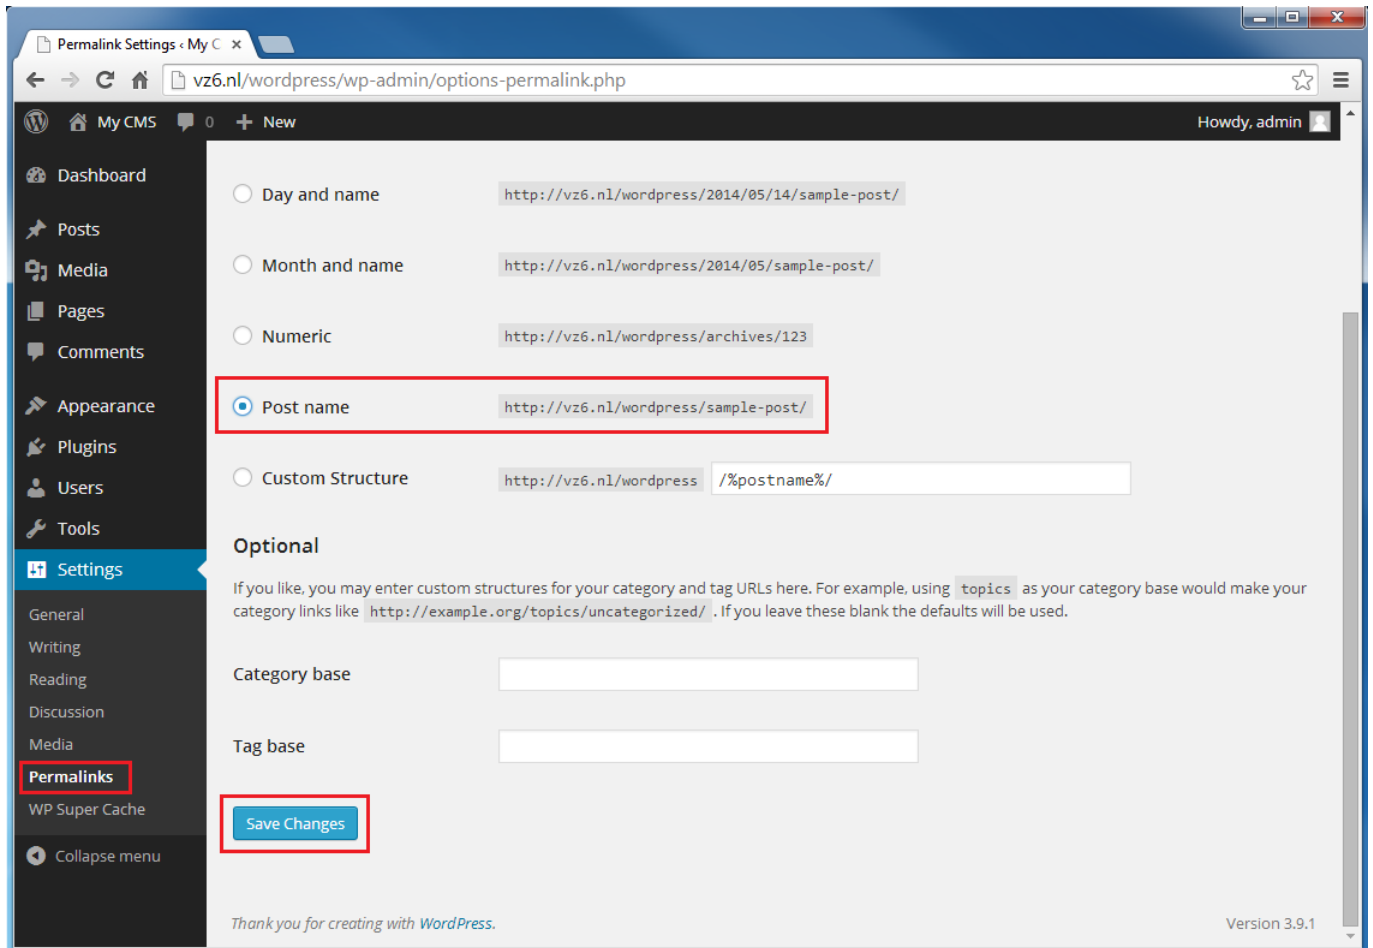

5. Als je na het klikken op Settings onderstaande foutmelding krijgt. Klik dan op Permalinks Options Page (rood omlijnd). Indien je geen foutmelding krijgt, ga dan door naar stap 8.

Scripts

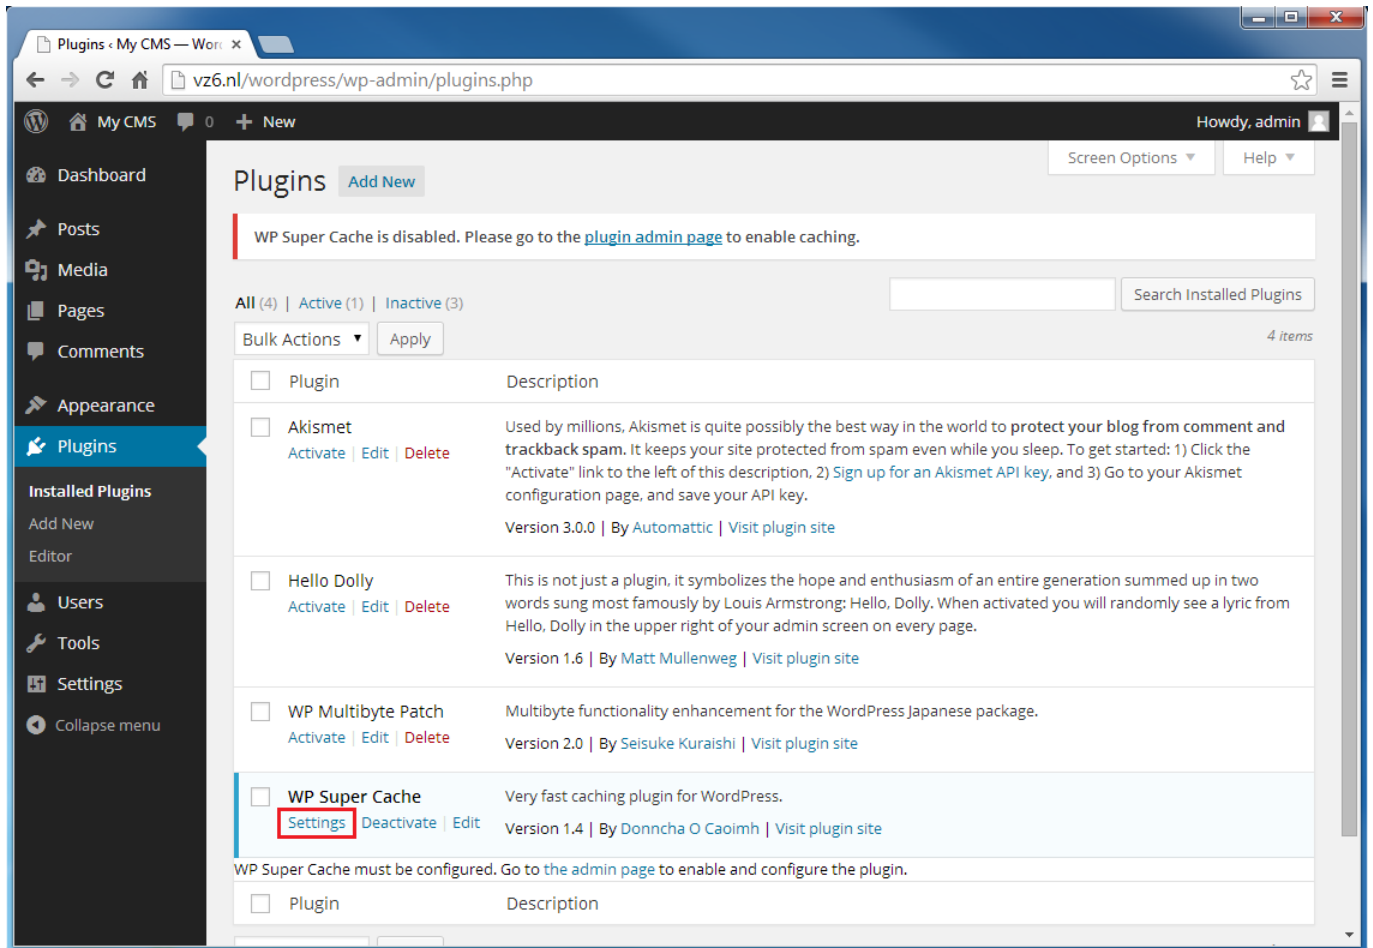

6. Selecteer onder Permalinks voor Post name en sla de wijziging op.

Scripts

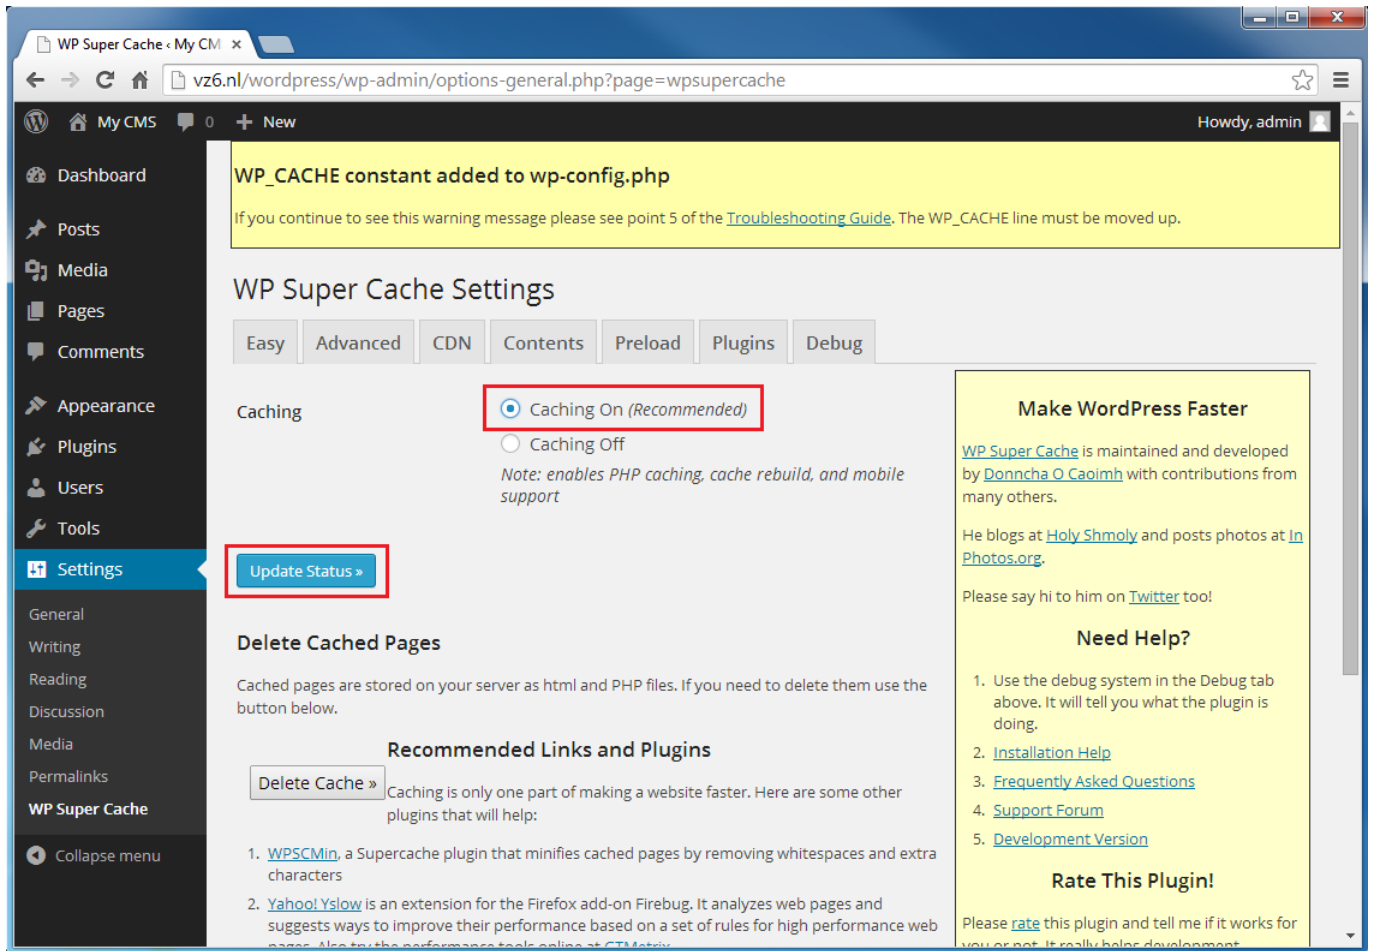

7. Ga nu terug naar Plugins, klik op Installed Plugins en probeer nogmaals op Settings te klikken bij WP Super Cache. Nu moet het goed werken.

Scripts

8. Zet nu het vinkje bij 'Caching ON (recommended)' en daarna op Update Status. Caching is nu succesvol geactiveerd.

Scripts

Loguit, en surf naar je website. Je zal merken dat je website nu aanzienlijk sneller laadt!
