SNI inschakelen onder Plesk

- 1. Login als admin of root op Plesk
- 2. Ga naar Tools & Settings en open de Plesk installer via "Updates and Upgrades"

3. Klik op Add/Remove Components

Statings - Plesk 12 >	K 🎦 Plesk Installer 🛛 🗙 💽			
← → C				☆ 💷 🔳
(*)	Install and Update O Summary Updates source and in	din Products stallation settings	Odin	*
	Install or Upgrade Product Install a new product or upgrade an existing one	Add/Remove Components Add/Remove components for an installed product	Update Components Update the components for which there are available updates	
	Products summary:			
	Plesk v. 12.5.30		Component updates are available	
	Sitebuilder 4.5 and earlier vers	ions (for Plesk 9 and earlier)		
	SSO Not installed			

4. Controleer of onder Web hosting > Apache > **Apache web server with SNI** support staat aangevinkt. Indien niet, zet het rondje van **Apache** naar **Apache** web server with SNI support en klik op Continue.
