Hoe een map beveiligen?

Via ons controlpanel kan een map worden beveiligd met een gebruikersnaam en wachtwoord.

1. Login op het Mihos.net controlpanel.
2. Klik na het inloggen op **Password-Protected Directories**.

Controlpanel

The screenshot shows the Mihosnet control panel interface. The top navigation bar includes the Mihosnet logo, a search bar, and user information: "Logged in as Mihosnet" and "Subscription mihos-test-domein.nl". The left sidebar contains a menu with options: Websites & Domains (selected), Mail, Applications, Files, Databases, Statistics, Users, and Account.

The main content area is titled "Websites & Domains" and includes a sub-header "This is where you set up and manage websites." Below this, there is a section for "mihos-test-domein.nl" with details: "Website at httpdocs/", "IP address: 109.237.214.122", and "System user: mihostestdomein". Action buttons include "Hosting Settings", "Open", "Suspend", "Disable", and "Description".

Below the domain details, there are icons for "File Manager", "Mail", and "Databases", along with an "Add Database" button. A "SHOW LESS" link is also present.

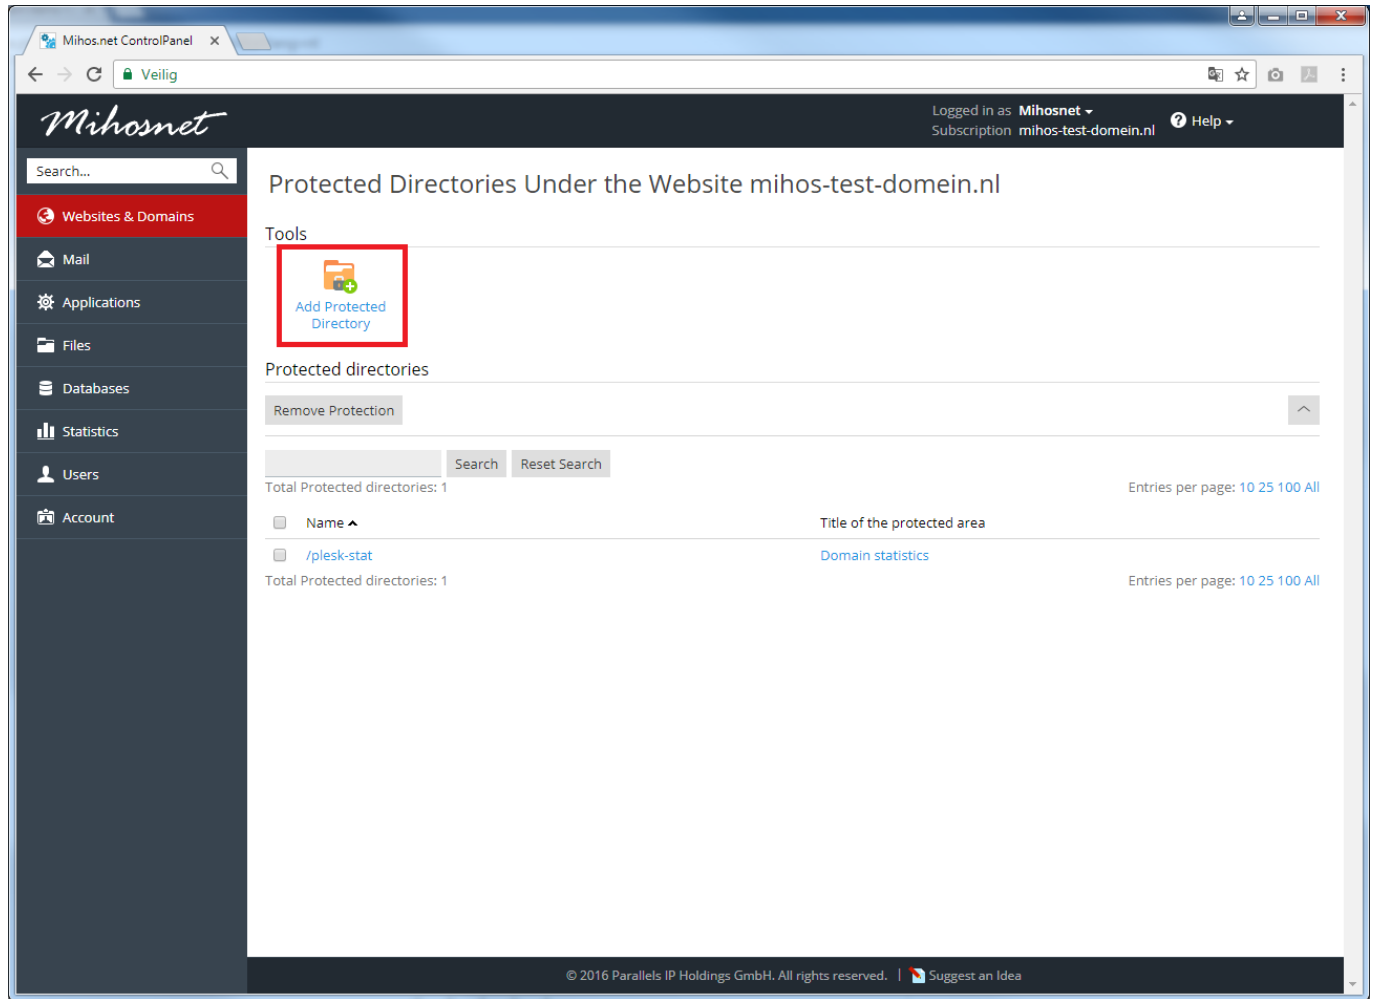

The main grid of icons includes: Web Hosting Access, FTP Access, Hosting Settings, PHP Settings (PHP version: 5.4.45), Applications, File Manager, Web Statistics, DNS Settings, Email Addresses, Mail Settings, Limit Outgoing Messages, SSL Certificates, Password-Protected Directories (highlighted with a red box), Logs, Web Users, Bestel extra domeinnaam, Comodo SSL, and Upgrade Webpace. A "Let's Encrypt" icon is also visible at the bottom.

On the right side, there is a "Resource Usage" section showing: "Disk space: 2%" (62.8 MB used of 2560 MB) and "Traffic: 0%" (0 MB/month used of 100 GB/month). A "View More Statistics" link is provided.

The footer contains the copyright notice: "© 2016 Parallels IP Holdings GmbH. All rights reserved." and a "Suggest an Idea" link.

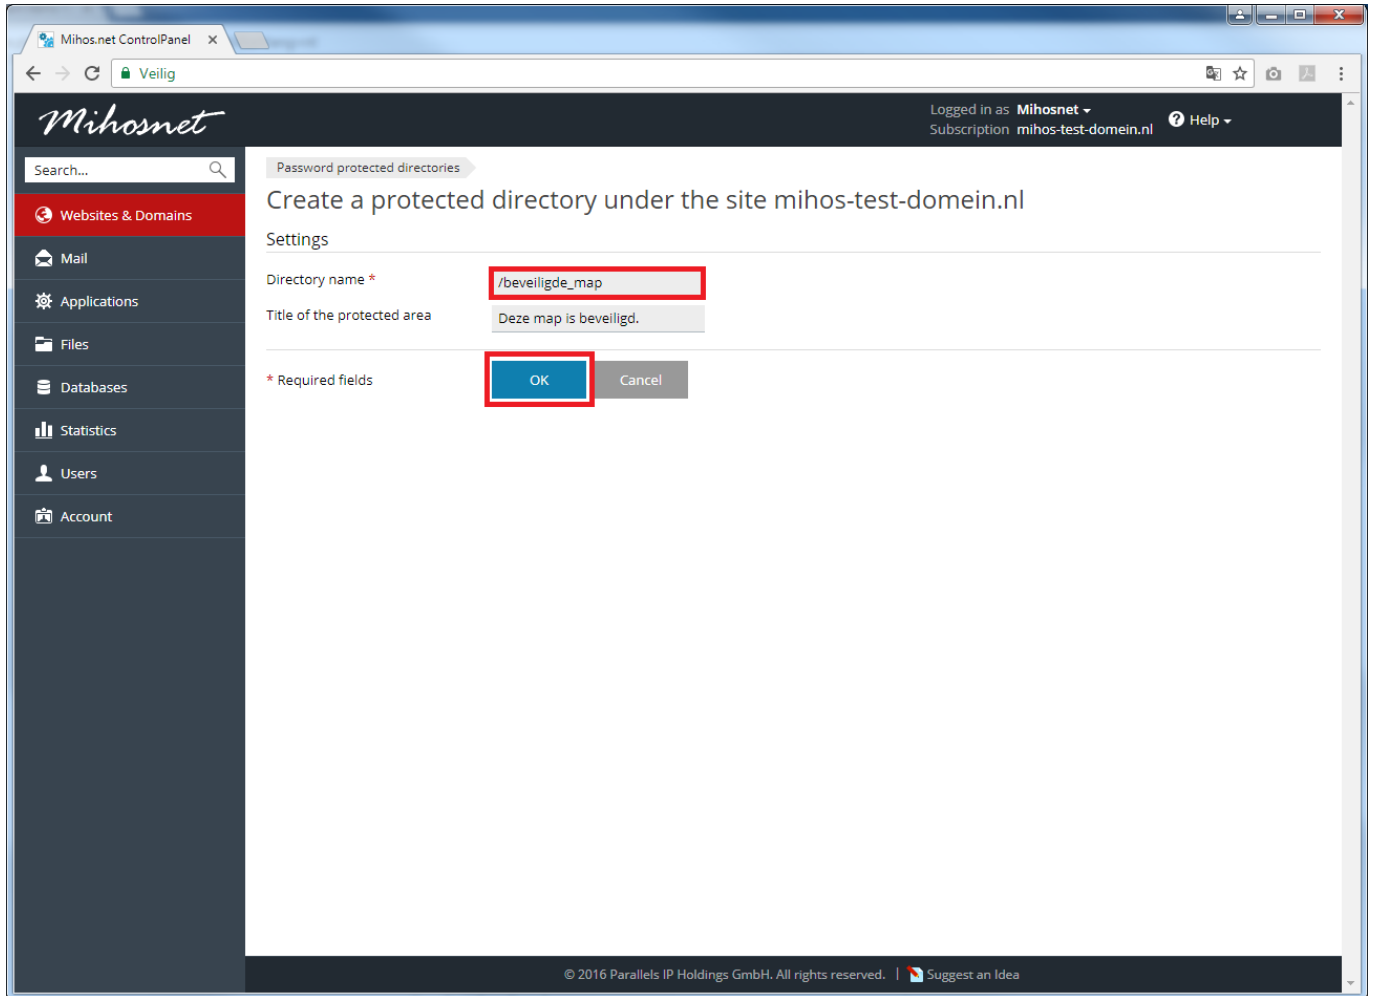

Controlpanel

3. Je krijgt nu een pagina te zien van reeds beveiligde mappen. Klik op **Add Protected Directory** om een nieuwe map te beveiligen.

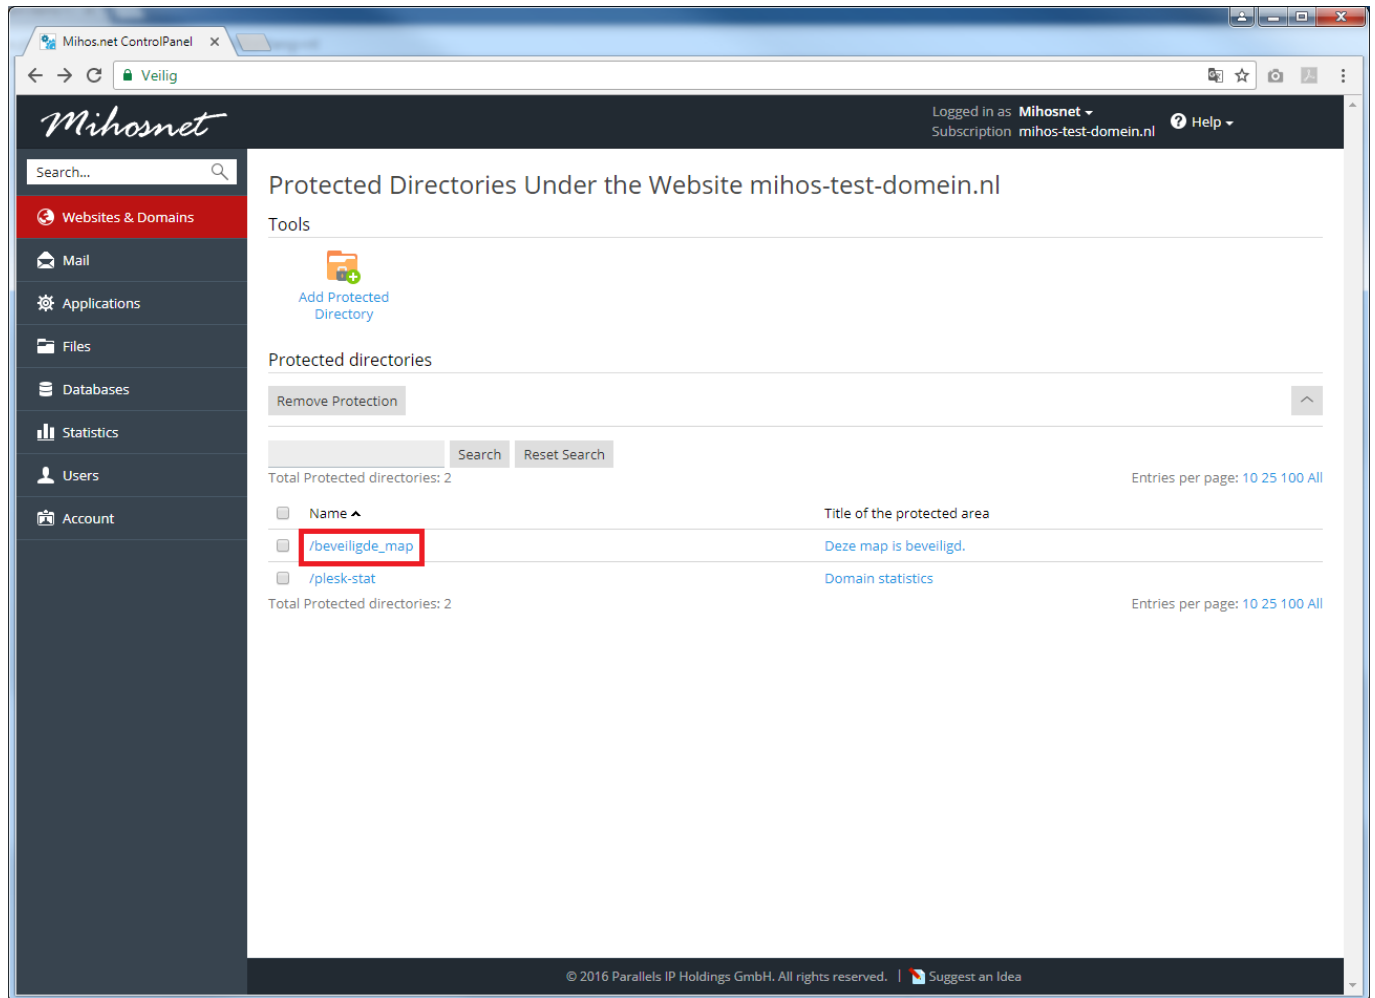

4. Geef nu de naam op van de map die je wilt beveiligen bij **Directory name**. In onderstaand voorbeeld is dat `"/beveiligde_map"`. Daarmee beveilig je de map: `http://www.mijndomeinnaam.nl/beveiligde_map`

Controlpanel

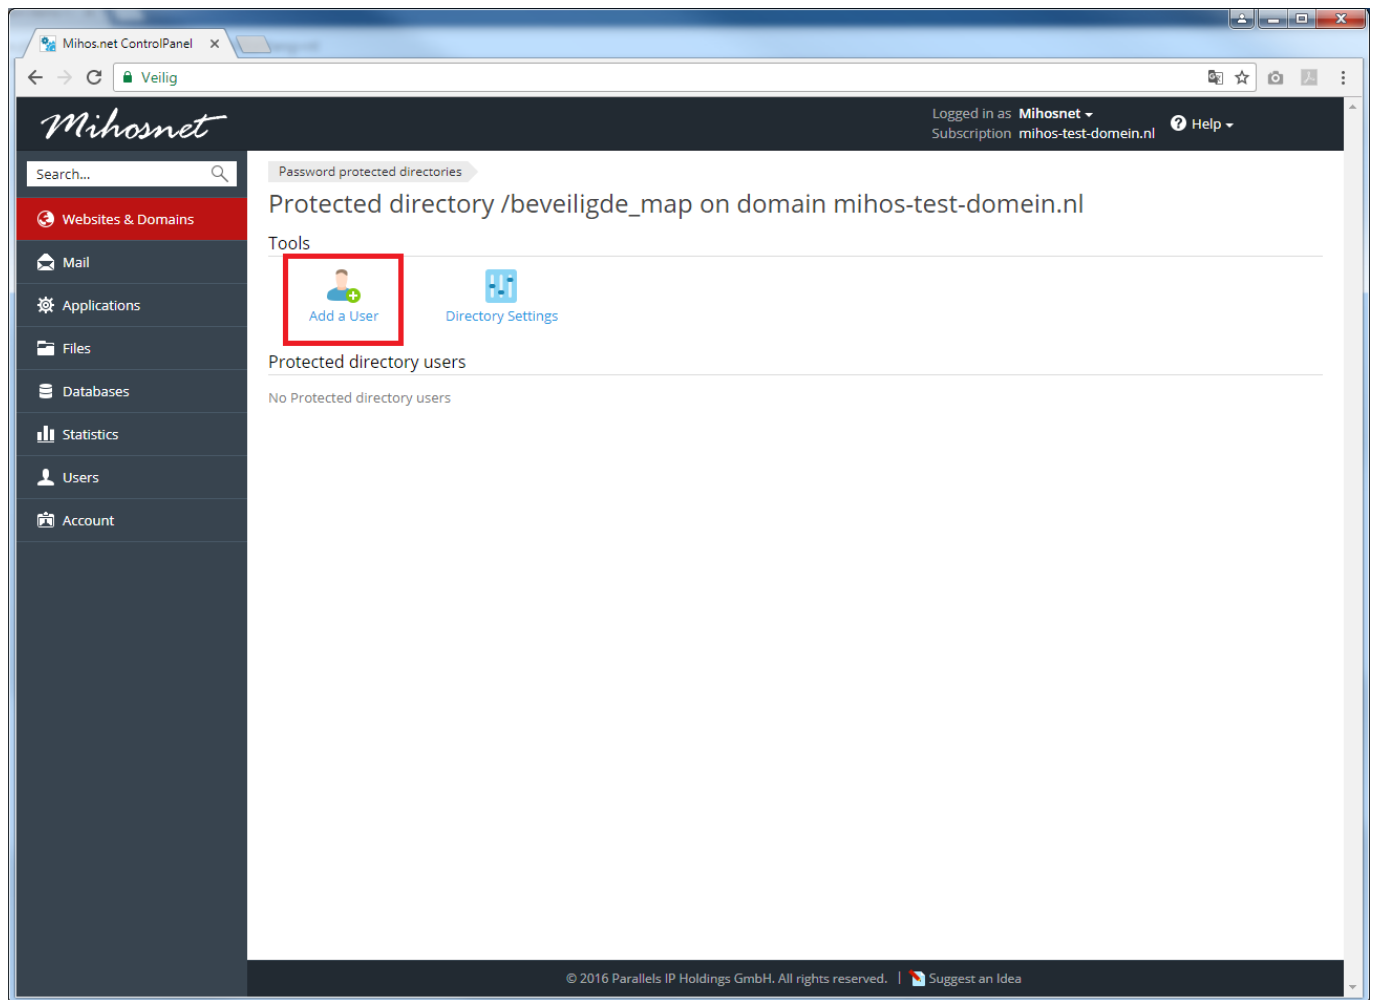

5. Nu je de map hebt beveiligd moeten er gebruikers worden toegevoegd. Dat doe je door op de zojuist aangemaakte map te klikken.

Controlpanel

6. Klik nu op **Add a User** en voeg één of meerdere gebruikers toe met een wachtwoord naar keuze.
