

E-mail & webmail

Wachtwoord wijzigen van een mailbox

In deze handleiding leggen we uit hoe je het wachtwoord van een mailbox opnieuw kunt inloggen. Het opnieuw instellen van een mailbox wachtwoord moet gedaan worden via ons controlpanel.

Zo wijzig je het wachtwoord van een mailbox

1. Login op het controlpanel. [Klik hier om de login pagina te openen](#).
2. Klik op Mail of Email Addresses. Beide knoppen komen op dezelfde pagina uit.
3. Er wordt nu een overzicht van mailboxen getoond die reeds aangemaakt zijn zoals in onderstaand screenshot. Klik op een bestaande mailbox om daarvan het wachtwoord te wijzigen. Staan er geen mailboxen? Volg dan de handleiding: [Hoe maak ik een emailadres aan?](#)

Email AddressesMail SettingsOutgoing Mail Control

Create and manage email accounts associated with your domains. For each email account, you can set up a mailbox, a number of additional email addresses that will point to the same mailbox (email aliases), an auto-reply, and mail forwarding to one or several email addresses. You can also set up protection from spam and viruses, if these services are available for your account.

E-mail & webmail

4. Geef het nieuwe wachtwoord 2x op. Bij Password en bij Confirm password. Klik daarna op OK.

The screenshot shows the Mihosnet webmail configuration interface. The browser address bar displays the URL <https://ns1.mihosnet-40.nl:8443/smb/email-address/edit/id/207>. The page title is "info@mihos-test-domein.nl". The left sidebar contains navigation links: Search..., Websites & Domains, Mail (selected), Applications, Files, Databases, Statistics, Users, and Account. The main content area shows the "Email Addresses" section with tabs for General, Forwarding, Email Aliases, and Auto-Reply. The "General" tab is active. A warning message states: "If this email account is associated with an auxiliary user (Access to the Customer Panel is enabled), the changes you make on this page affect this user's settings. Particularly, if you change the email address and password, the auxiliary user's login and password will be changed to the new values as well." The "Email address" field is filled with "info@mihos-test-domein.nl". The "Password" field is empty and highlighted with a red box. Below it, a note says: "This password will be used for accessing the mailbox and for logging in to Plesk if the address is associated with an auxiliary user." There are "Generate" and "Show" buttons. The "Confirm password" field is also empty and highlighted with a red box. Below it, a note says: "The description is visible to everyone who has access to this email account." The "Mailbox" section has a checked "Mailbox" option and a "Default size (Unlimited)" radio button selected. The "The maximum number of outgoing email messages" section has a "Default (100 messages per hour)" radio button selected. The "Description in Plesk" field is empty. At the bottom, there are "OK", "Apply", and "Cancel" buttons. The footer contains the text: "© 2016 Parallels IP Holdings GmbH. All rights reserved. | Suggest an Idea".

5. Controleer nu of je kan inloggen op webmail: <https://webmail.mihos.net>

Wat is nu mijn gebruikersnaam?

De gebruikersnaam is het emailadres. Dus als je van mailbox `info@mijndomeinnaam.nl` het wachtwoord hebt gewijzigd naar `ABC123!`, dan is de **gebruikersnaam** `info@mijndomeinnaam.nl` en het **wachtwoord** **ABC123!**

Unieke FAQ ID: #1113
